Lender Loan Id

Folder Description (max 240 characters)

* Double click a row to edit an email address

Alert	Last Name	First Name	Email Address

FlexConnect provides faxing capability to aid in the process of adding files to the loan folder specified. To ensure prompt and accurate delivery of documents we have provided the ability to create coversheets for your fax transmissions.

Borrower First Name: Test
Borrower Last Name: Homeowner

Document Type: *

- Coversheet
- 1008/1003
- Credit
- Income
- Assets
- Collateral
- Title
- Appendix
- AU Findings and Feedback

In order to generate a coversheet select one or more document types from the list and click the generate Coversheet(s) button. To generate all the coversheets in a loan file click the Select All button and then click the Generate Coversheet(s) button. To clear your selections click the Clear button.

The coversheets will be generated and displayed in Adobe Reader. Use Reader's print functionality to print the coversheets. Each coversheet should be placed immediately in front of the corresponding document to fax to this loan folder. Once the coversheets and corresponding documents are in the correct order place the batch on the fax machine and transmit.

The fax number is: x2029
 FlexConnect will not accept one fax transmission for multiple loan folders
